

# **'PARROT' MINIKIT SLIM**

## **QUICK SET UP GUIDE**

*Thank you for purchasing the NEW MINIKIT SLIM portable Bluetooth Car Kit.*

*Your new MINIKIT SLIM has many revolutionary features making it the easiest to use portable Bluetooth car kit on the market.*

*You can Pair up to five phones to the MINIKIT SLIM and assign up to 1,000 voice dial contacts per phone.*

*Please follow these simple steps to ensure you understand how your MINIKIT SLIM operates.*

### **Step 1 – Connection (Pairing) & Set Up**

- *Turn the power 'RED' button (Left Hand) 'ON' on the MINIKIT SLIM, the kit is now in pairing mode*
- *Turn the Bluetooth connect 'ON' on your mobile phone*
- *From your Bluetooth connection menu on your phone 'Search for new devices'*
- *Once the PARROT MINIKIT SLIM has been located please accept the kit for pairing*
- *The phone will ask for an access code, please enter 1234*
- *The phone and MINIKIT SLIM will now connect and a Beep will confirm pairing has been done successfully*
- *At this stage please do not push any buttons as the phone contact list from your phone will now be down loaded & synchronized*
- *Some phones may ask you to authorize the MINIKIT SLIM before allowing the phone contact list to be synchronized, please ensure to approve the kit*
- *Once the phone contact list has been downloaded from your phone the MINIKIT SLIM will say "Down Load Complete"*
- *Please note some phones may only allow phone contacts to be down loaded from the phone only so you may have to transfer contacts from the SIM Card to the phone before synchronization can take place*
- *You are now ready to use your MINIKIT SLIM*

### **Step 2 – Making Calls from the MINIKIT SLIM**

- *With the MINIKIT SLIM turned 'ON' push the 'GREEN' button (Right Hand)*
- *The MINIKIT SLIM will then ask "Who do you want to call?"*
- *All you have to do is say the name of the contact from the phone book and the kit will dial the number assigned to the contact*
- *Please note the MINIKIT SLIM reads the contact the way it has been put into your contact list so it is important to know how the name has been entered*
- *You can scroll through the contact list using the main center control knob when you have located the 'Phone Book' Menu on the MINIKIT SLIM*
- *If you have multiple entries in your contact list for the same person ie; Sam – Home, Sam – Work, Sam – Mobile you can say each of these individually in full (Sam – Home etc) or if you just say Sam the MINIKIT SLIM will ask which one you would like to call.*
- *To end a call simply push the RED Button (Left Hand)*
- *If you would like to accept the call but talk privately on your mobile (Discrete Mode) simply push the GREEN Button once the call has been commenced, this will shut down communication of the call to the MINIKIT SLIM*
- *You should get 15 hours talk time and 20 days standby time from your MINIKIT SLIM, however we suggest keeping the unit well charged to eliminate the inconvenience of the battery running out. Also ensure your mobile phone is fully charged or plugged into the cig charger to ensure the phones Bluetooth service is optimized.*
